

Azolla
YOUR DECARBONIZATION PARTNER

Profitable Pathways to Decarbonization

Strategic decarbonization for energy efficient marine operations

Impactful decarbonization without compromising profitability

Azolla helps shipowners navigate the complexity of global emissions regulations - from IMO's CII to EU ETS and FuelEU Maritime regulations. We deliver end-to-end decarbonization solutions that align emission goals with commercial performance through technology advisory, project execution, and compliance automation.

Who is Azolla for?

Shipowners & Operators

Sustainability & ESG teams

Fleet Managers

Technical Superintendents

A structured approach to maritime decarbonization

Energy Efficiency Services

- Decarbonization consulting to align reduction strategies with ROI and vessel operations.
- Vessel EQ technology to screen upgrade potential and operational carbon savings.
- Project Management for full lifecycle support from feasibility to retrofit.
- Underwater services with hull performance optimization to reduce resistance and fuel use.

Regulatory & Compliance Services

- Advisory & Execution to meet IMO, EU, and regional mandates.
- CASPER™ technology to manage EU ETS, FuelEU, and emissions forecasting.
- EUA Procurement & FEUM Pooling to optimize allowance strategy and compliance costs.

Future-proof fleets with strategic maritime decarbonization

Maintain fleet compliance to CII, EU ETS, and FuelEU standards.

Automated compliance with CASPER™ for audits and forecasting.

Maximize returns from energy-saving investments.

Operational crew training for long-term decarbonization success.

Trusted expert guidance across fuels, tech, and compliance.

Future-ready strategy with proactive planning.

End-to-end delivery from feasibility to retrofit, tracked and optimized.

Thousands of tonnes of emissions prevented

200+

Projects completed

300+

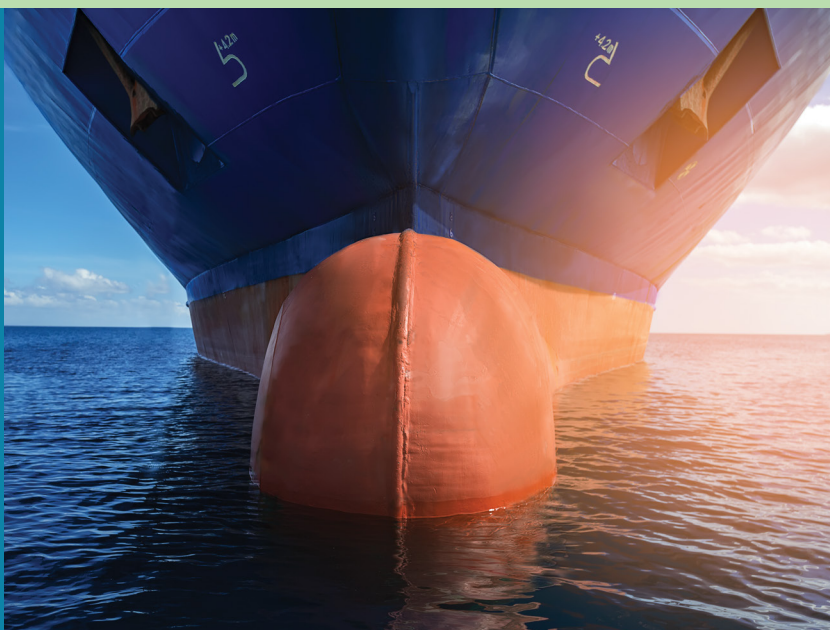

Vessels serviced

100+

Vessel efficiency evaluations

100+

Underwater hull services completed in 2 years

60+

Energy Saving Device (ESD) installations in 3 years
