

Rest and work hours management software for seafarers

CreWorks is a digital platform built to digitalise and better maintain records of rest hours. It helps shipowners and fleet managers ensure alignment with IMO, SIRE 2.0, and MLC 2006 by simplifying scheduling, tracking, and audits, while prioritizing crew well-being and operational safety.

Who is CreWorks for?

Fleet Managers

Manning Offices

Chief Engineers & Captains

Crewing Officers

HSEQ Teams

A streamlined approach to crew rest hours management

Interactive dashboard to enter rest hours.

Two-way monitoring from ship to shore and vice versa.

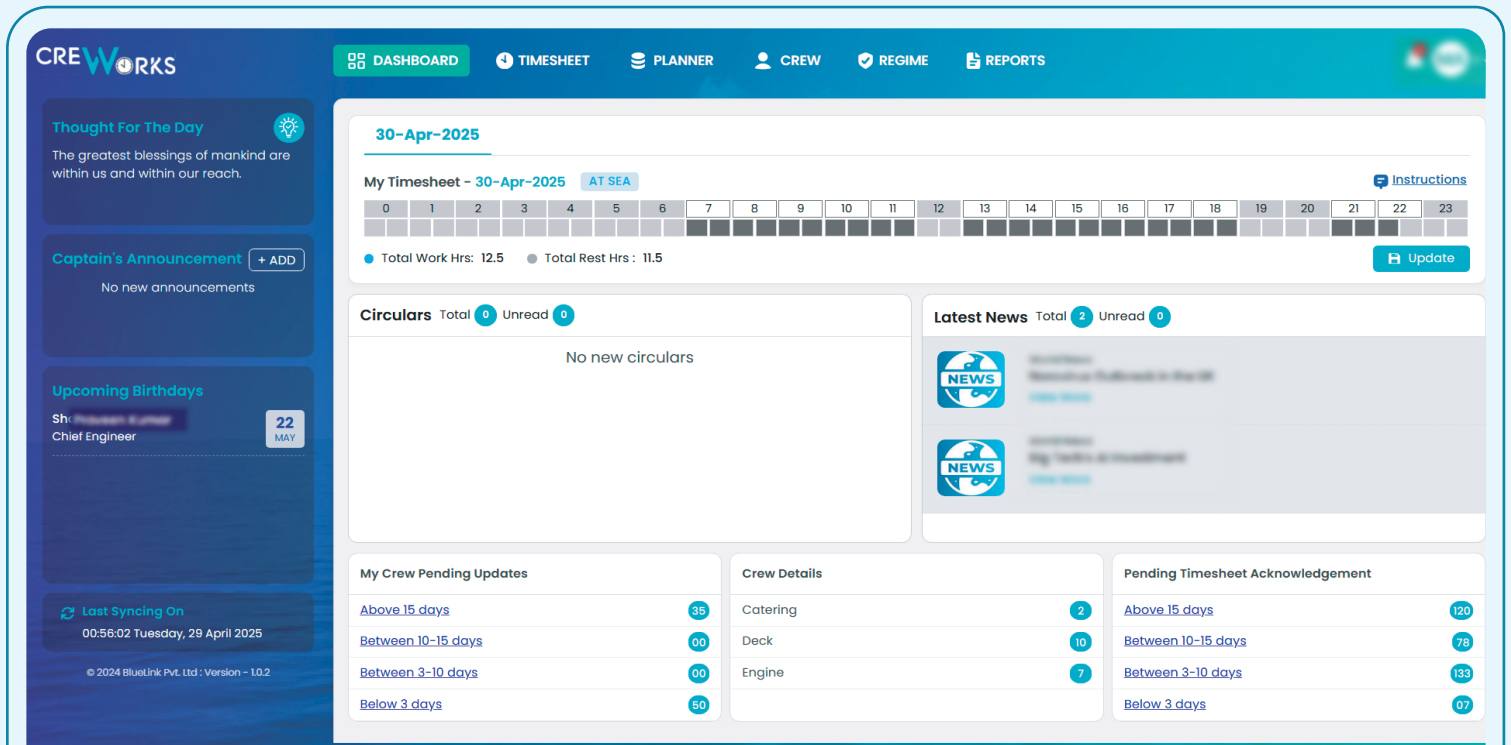

Helps Master and HODs to plan seafarers rest hours with planning tools.

Provide rank-specific login and dashboards for better role visibility.

Generate fleet-wide reports for centralized monitoring.

Offer secure whistle-blower access for crew violation reporting.

Deliver connectivity features like news and enrichment tools.

Single solution for better crew rest hour management and compliance

1

Prevent compliance violations with real-time tracking and alerts.

5

Gain full visibility across vessels from a single dashboard.

2

Reduce fatigue risks through structured scheduling and planning.

6

Centralize crew management in one easy-to-use system.

3

Keep crew engaged with access to global news and content.

7

Integrate seamlessly with existing onboard platforms.

4

Simplify audits with instant regulatory reporting and audit dashboard.
