

LSA/FFA Services

Compliance made simple, safety made seamless

Marine safety systems must always be emergency-ready, but managing service schedules, certifications, and compliance across ports is complex. Our LSA/FFA Services simplify it with end-to-end maintenance, real-time tracking, and automated reminders—ensuring vessels remain compliant, safe, and operational worldwide.

Who are the LSA/FFA services for?

Shipowners &
Operators

Fleet
Managers

Technical
Superintendents

HSEQ
Teams

The one-stop solution for all marine safety equipment needs

- Maintenance of LSA equipment such as lifeboats, rafts, SCBA, EEBD, and immersion suits.
- FFA equipment servicing for portable/fixed systems, CO₂, foam, and dry chemicals.
- Sensor calibration for all UTI meters, tank radars, and gas detection tools.
- Testing and analysis for foam, powder, and water quality checks.
- Thorough regulatory compliance checks per IMO, SOLAS, and flag-state requirements.
- Cloud-based tracking to view history, schedules, and certificates instantly.
- Global port support with service access across major global locations.

Comprehensive & expert-driven marine maintenance solutions

-  Keep fleets compliant with timely alerts and audit-ready documentation.
-  Get global coverage and reliable service wherever vessels dock.
-  Fixed pricing for predictable maintenance planning.
-  Access all service data in one cloud-based dashboard.
-  Reduced downtimes and emergency costs with proactive scheduling.
-  Full-service marine safety support under one roof.
