

ENABLING PROFITABLE PATHWAYS
for maritime decarbonization.

azolla
by Synergy Group

Regulations are here and now.

At Azolla, we understand shipping companies' challenges as they are mandated to navigate increasingly stringent emission regulations, such as **CII**, **EU ETS**, and **FUEL EU Maritime**

These regulations require comprehensive strategies and proactive measures to ensure compliance and minimize operational disruptions. **Let us help you navigate these challenges and achieve cost-effective compliance.**

Azolla Impact

Here's what we've made possible
— and we're just getting started.

50+

Turnkey EET installations undertaken.

150+

Turnkey scrubbers and BWTS projects completed.

100+

Vessels evaluated for carbon abatement potential and future-proofed with goal-driven roadmaps.

250+

Vessels onboarded on C-A-S-P-E-R™ for seamless EU-ETS and FEUM services.

Turnkey Retrofit solutions

Unparalleled expertise and unwavering adaptability ensure that your projects are managed and transformed with precision and excellence.

Unparalleled expertise

With over 250 projects completed, we excel in maritime engineering, project management, and converting vessels into efficient, eco-friendly powerhouses.

Continuous monitoring

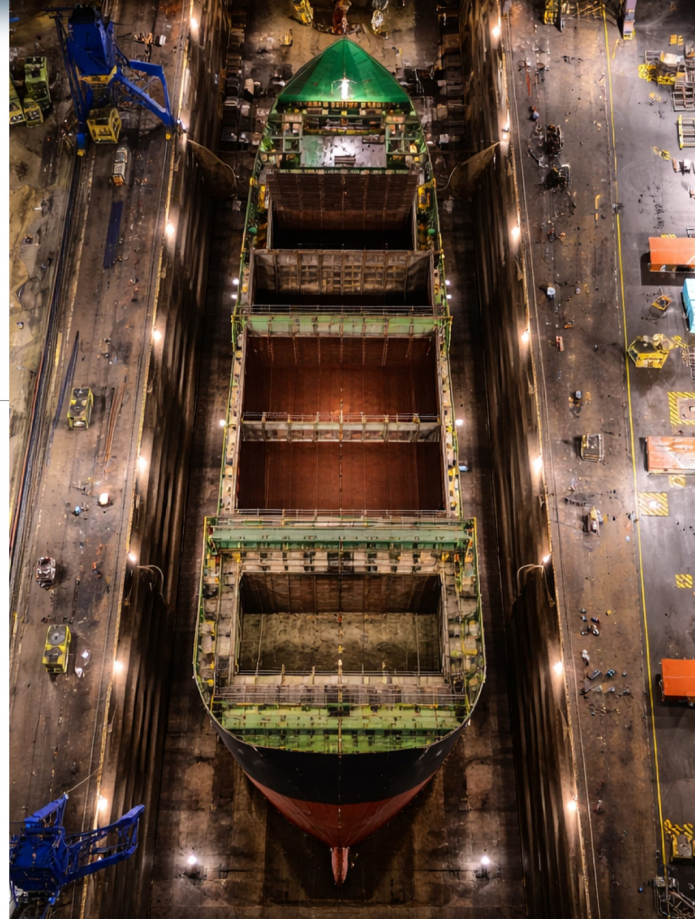

Proactive maintenance plans and continuous monitoring to maximize vessel performance and longevity.

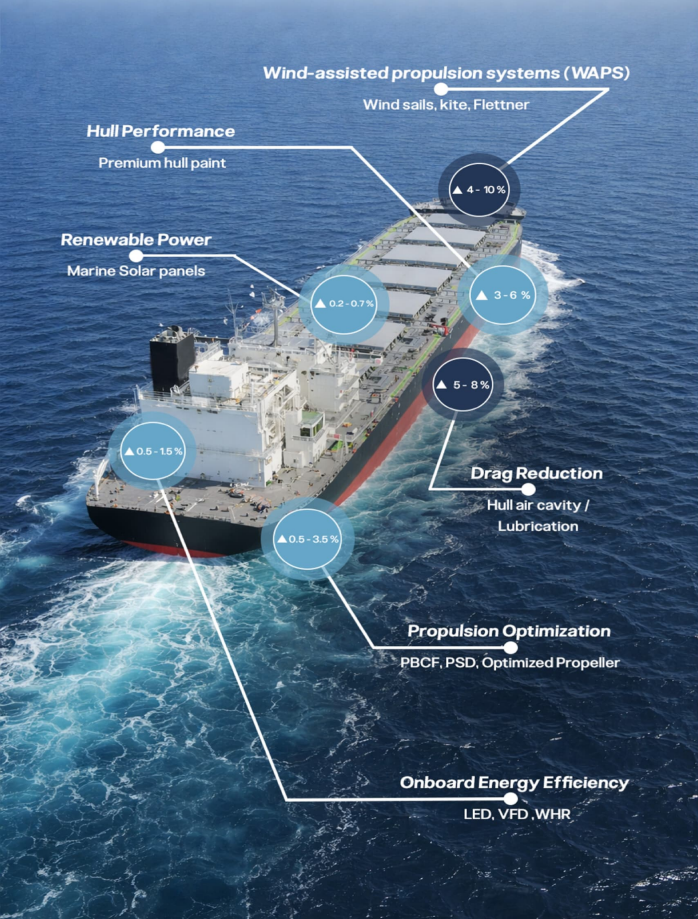

Insights-Backed Execution

Approach underpinned by insights and data, ensuring that the vessel's transformation manifests as tangible efficiency gains and reduced emissions.

End-to-End

Our seasoned team manages projects end-to-end, including procurement, logistics, deployment, and commissioning.

Decarb Consulting

Understanding and unlocking the true potential of the vessel.

Vessel-specific abatement strategy

In-depth analysis of vessel fuel and energy usage, operational practices, design intricacies, and market-based measures, to determine possibilities

Based on Investment parameters

Investment parameter driven measures for achieving the required CII.

Executable implementation plan

Synchronizing the achievable saving potential with the vessel's dry dock, ensuring no off-hire.

ROI driven approach

Understand post-retrofit, yearly OPEX savings and accumulated cash flow before taking key decisions.

Azolla FEUM Compliance Pool

Cost-effective pooling for deficit vessels

No MOQ (small CB OK)

Fixed €/CB pricing

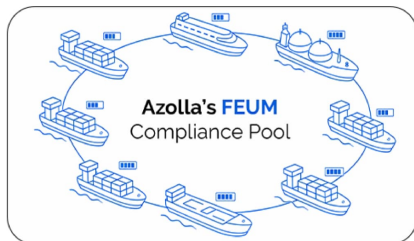

Allocation certainty

Single verifier pooling

Verified audit trail

Contract-backed cover

Terms that fit cashflow

As your pool operator, Azolla secures surplus allocation capacity and manages end-to-end execution: contracting, allocation, documentation, and verifier coordination for a clean close-out.

Spot EUA procurement

Live-priced EUAs with fast, documented execution

Live screen pricing

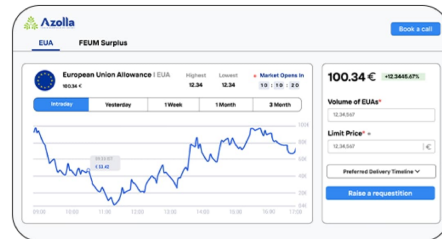

Fast execution

Delivery to your MOA

Flexible settlement

Clear fees, no surprises

Audit-ready paperwork

As your execution partner, we confirm quotes against the live screen, deliver EUAs on a spot or scheduled timeline, and provide a complete documentation pack for internal audit and compliance.

Under water services

From inspection to repair —planned, safe, and documented

Worldwide coverage

Rapid mobilisation

Inspection + maintenance

Single-point coordination

Class-ready documentation

Transparent scope & pricing

Azolla supports vessel underwater requirements across global ports with fast mobilisation, clear reporting, and documentation-ready outputs.

Emission Mapping

Build your scope 1-3 baseline across fleet, shore, and value chain

Scope 1-3 mapping

Fleet + shore boundary

Materiality screening

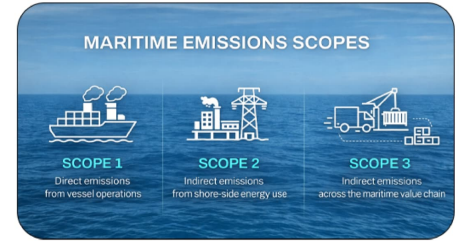

Data templates + QA

Emission factors library

Audit/assurance - ready

CSRD / ISSB / BRSR- ready

Decarb roadmap inputs

Azolla helps maritime organisations build Scope 1–3 GHG inventories across vessel operations, shore energy, and key value-chain categories. We centralise data, quantify emissions, and deliver an assurance-ready baseline for credible reduction planning.

LET'S STAY COMPLIANT AND FUTURE-PROOF YOUR VESSELS
